

## **PARAGRAPH ON ONLINE CLASSES EXPERIENCE**

My experience of online classes is completely different from taking traditional classroom sessions. My school has started online classes post-lockdown. All my teachers are trying their best to clear my doubts. After explaining the lesson, our teachers provide us notes of the chapter and assign us homework. The exams are held online. Now, I have much more time to spend on my hobbies. A couple of times, there are some issues relating to the poor quality of internet connection. I really miss physical classroom and interacting with my teachers and class-mates. In my opinion, a physical classroom is much more effective than online learning. But these classes have helped me to keep up with my studies and disciplined towards learning. This has also inspired me to explore new digital learning tools. So, I find my experience of online classes as helpful.
