

Essay on How I Spent My Summer Vacation in 150 words

Summer vacation is the time every student looks forward to. It is a break from studies and a chance to relax and enjoy. This year, I spent my entire summer vacation at home. Although I did not travel anywhere, I made sure to spend my days in a meaningful and enjoyable manner.

Every morning, I woke up early and did simple exercises to stay healthy. After that, I helped my mother with household work like cleaning and cooking. I also completed all my holiday homework on time and revised important subjects. I also read some interesting books and watched a few good movies. I also watched some educational videos to improve my English.

In the afternoons, I practiced painting and improved some basic computer skills through online videos. I found it interesting and helpful. In the evenings, I played outdoor games with my siblings and friends in the nearby park.

Spending vacation at home taught me discipline and responsibility. It was peaceful and refreshing. It prepared me mentally and physically for the upcoming school session.
